@Ragham - Accounting Application (Startup)

Dec 2023, Present

Ragham is a startup specializing in accounting software for Android and Web. The app helps small businesses manage debts, credits, and financial records efficiently, serving over 10,000 active users.

- **Maintained Legacy Application:**
  Provided ongoing maintenance and addressed critical issues in the legacy application built with Vue.js and Nuxt.js, ensuring continuous functionality.
- **Developed New Version:**
  Initiated and structured a new version of the application using Next.js and TypeScript, significantly improving efficiency and performance.
- **Web Development Insights:**
  Introduced modern web development practices and collaborated closely with the backend team to ensure API suitability for web applications.
- **Performance Optimization:**
  Identified and addressed key issues in the old application, leading to a more robust and efficient new version.
  - **Pagination Implementation:**
    Solved slow startup issues by implementing pagination, leading to faster load times.
  - **Virtualization Technique:**
    Addressed laggy DOM rendering caused by long data lists by using virtualization, resulting in smoother performance.
  - **Backend Processing:**
    Moved search, filter, and sort functionalities to the backend to enhance performance and compatibility with pagination.
  - **Request Optimization:**
    Employed debouncing and aborting techniques to optimize server requests, reducing load and improving response times.
- **Design Improvements:**
  Redesigned several aspects of the application to be more suitable for web use, enhancing overall usability and aesthetics.
